

MOHIT WAT

DATA SCIENCE & BUSINESS ANALYTICS

+91-7796301657 | mohit.25aa231554@sbup.edu.in | Pune, Maharashtra | www.linkedin.com/in/mohit-wat-16b142255

SUMMARY

MBA (Data Science & Business Analytics) candidate with strong skills in SQL, Python, Excel, and data visualization. Experienced in building data-driven solutions and dashboards to improve decision-making and operational efficiency. Demonstrates leadership, analytical thinking, and a proactive approach to solving business problems.

EDUCATION

Balaji Institute of Modern Management | Sri Balaji University (2025-2027)
MBA-Data Science and Business Analytics
Grade:- Pursuing

JSPM’s Imperial College of Engineering and Research | Pune University (2021-2025)
BE-Electronics and Telecommunication Engineering
Grade:- 71.38%

Dr. Ambedkar College | Nagpur University (2019-2021)
HSC-Science (Electronics)
Grade:- 91.67%

SKILLS

Programming: SQL, Python
Analytics: Statistics, Multivariate Analysis, Business Analytics
Tools/Platforms: Excel, Tableau, Jupyter-Notebook, GCP(basics), SAS (basics)
Other Skills: Information Gathering, Strategic frameworks, Decision Making, Documentation

INTERNSHIP

Global Calibration, Ranjangaon MIDC | Calibration Intern (7 Jan 2025- 20 Feb 2025)

- Visited many multinational companies like LG Electronics, GMCC, etc.
- Prepared in-lab JIG Testing Kit for on-site Calibration.
- Worked under the supervision of Technicians from various companies for Instrument repairing.

PROJECTS

EagleEye (working) (2025)

- Identified inefficiencies in manual attendance tracking and implemented a real-time, role-based system to streamline daily operations.
- Automated Excel-based attendance processing and built interactive dashboards, reducing errors by 90% and improving data accuracy for 56 students.

- Translated user requirements into analytical workflows, enabling faster decision-making and smooth adoption across students and administrators.
- Tools used:- Excel, Python, Pandas, Matplotlib, Power BI

Solar-based Smart Grass Cutter

(2025)

- Developed an IoT-enabled autonomous grass-cutting system to address manual maintenance inefficiencies, reducing human effort by 40%.
- Designed obstacle avoidance and dual-mode control to improve operational safety and system reliability.
- Integrated real-time GPS tracking to enable monitoring and manual intervention, enhancing usability and operational control.
- Tools Used: Embedded C, Arduino IDE

CERTIFICATIONS

- Data Management & Machine Learning using SAS tools by 'SAS' (2025)
- Business Analytics with Excel: Elementary to Advanced by 'John Hopkins University' (2025)
- Business Analytics for Decision Making by 'University of Colorado' - pursuing (2025)
- Data Analysis using SAP Analytics Cloud by 'SAP' - pursuing (2025)

POSITION OF RESPONSIBILITY & LEADERSHIP

- **Co-Technical Head | ETSA, JSPM's ICOER (2023–24)**
Led the planning and execution of technical projects, managing timelines and resources to deliver results on schedule, demonstrating strong project management skills for a fast-paced environment.
- **Co-Leader & Developer | Google Developer Student Club, ICOER (2023–24)**
Spearheaded workshops on Python and data tools for 100+ students, breaking down complex technical concepts to drive community-wide learning and data literacy—directly aligning with a culture of knowledge sharing and analytical growth.
- **Cultural Coordinator (Class Captain) | Utsah AIYASWAMI (Jul–Aug 2025)**
Acted as the primary liaison between students and faculty, efficiently gathering requirements and managing event logistics, which honed the ability to collaborate with diverse stakeholders and solve operational challenges.
- **Member | Tech and Digital Club, Balaji Institute (2025–26)**
Contribute to a collaborative, tech-driven team, engaging in initiatives that foster innovation and a proactive approach to solving business challenges with technology.
